Acrow Bridge and Structal-Bridges Sign Agreement to Expand Steel Bridging Solutions

Joint sales and marketing agreement broadens global portfolio in temporary and permanent modular bridging

(Parsippany, New Jersey) – 11 March 2013 – Acrow Bridge, a leading international bridge engineering and supply company, today announced an agreement with Structal-Bridges, Canada’s largest steel bridge manufacturer. Under the agreement, the two companies will jointly market their complementary solutions in temporary and permanent modular steel bridging.

“With our combined ability to deliver world class steel bridges with spans that can exceed 400 feet (122 meters) long and 4 lanes wide, we can now offer more choices to customers around the world,” Bill Killeen, President and CEO of Acrow Bridge, said. “Both companies’ modular bridging solutions are designed to roll into place without the need for large cranes. This enables us to install bridges in locations where limited space or heavy equipment has been a major obstacle to bridge building.”

Acrow Bridge and Structal-Bridges will also leverage each other’s extensive engineering and fabrication capabilities to enhance customer service and response time. Acrow Bridge’s main fabrication plant is located in the U.S. Structal-Bridges operates manufacturing facilities in both the U.S. and Canada. Both companies have engineering, sales and service staff located in company offices and at customer sites across the U.S., Canada, and around the world.

“Our collaboration is a natural extension of the commitment we share to design, engineering and service excellence,” said Robin Lapointe, Vice President, Structal-

Bridges. “We are excited about increasing our presence in North America and in other parts of the world through our partnership with Acrow Bridge and together, raising the bar in our industry to the benefit of our customers.”

About Acrow Bridge

Acrow Bridge has been servicing the transportation and construction industries for more than 60 years with a full line of steel bridge products for vehicle and pedestrian use. For more information, please visit www.acrowusa.com.

About Structal-Bridges

Structal-Bridges, a division of Canam Group Inc., specializes in the design, fabrication and erection of steel bridges as well as structural bearings, expansion joints and related products for highway, railway and forestry markets. Please visit www.structalbridges.ws for further information.
